

PRE-ANNOUNCEMENT

IC-3i International PhD Program

12 PhD positions in October 2016

Institut Curie's international PhD Program called IC-3i PhD program provides PhD students with a **3-year fellowship**, a high level **interdisciplinary**, **inter-sectorial**, and **international** training with dedicated career development plans, secondments and mentoring.

PhD research projects in life sciences cover Institut Curie's main research domains:

- ✓ **Biology & Chemistry of Radiations, Cell Signaling & Cancer**
- ✓ **Development, Cancer, Genetics & Epigenetics**
- ✓ **Integrative Tumour Biology, Immunology & Environment**
- ✓ **Multiscale Physics-Biology-Chemistry & Cancer**

Institut Curie brings together a world-class multidisciplinary **cancer research center** and a **model hospital group** in Paris and surroundings. By embracing cross-disciplinary approaches, it drives the discovery of more effective treatments and leads to improved patient care.
