SCHOOL OF MEDICINE

Course description

The Medicine and Surgery degree Course has an experimental profile, focused on one hand to use tools and teaching contents of the basic disciplines, characterized by a strong scientific value; on the other hand to an early interaction with the clinic, also through lessons and joint activities, in order to quickly achieve the basic concepts in the context of the health-disease binomial. The particular attention to the training of the student also in the communicative-behavioral and bioethical fields, as well as in the principles of health management and global health, will allow to achieve an enriched education that could be useful in Europe and all abroad, as well as in Italy, for example in contexts of intervention on multicultural populations or in contexts with frequent interactions with other countries.

Course structure

The course has a duration of 6 years, during which the student must acquire a total of 360 ECTS, 60 of which are professional internships that are already awarded from the first year of the course. Internships for medical license account for 15 out of 60 ECTS to be achieved for the medical degree. Students can personalize their study plan with elective educational activities of particular interest for a total of 8 ECTS.

Career opportunities

The main job opportunities for the medical doctors are represented by the possibility of carrying out his / her activity in the field of general medicine, in hospitals and in specialized public and private centers, national and international, as well as the possibility of carrying out health management activities or research in University Centers, public and private research Institutes.
